Answer Sheet

Notes: Addition squares

6 to 8

Solutions

1

+	2	9
4	6	13
6	8	17

2

+	5	3
8	13	11
7	12	10

3

+	2	9
6	8	15
4	6	13

4

+	3	4
9	12	13
8	11	12

5 and 6 have many possible solutions, especially if negative numbers are allowed.

Extension

It is easy to make up puzzles like these.

Simply put numbers across the top and down the left side of a square, then complete it so that 8 numbers altogether are in place.

Now delete 4 of the 8 numbers.

If the 4 numbers you delete are those that go along the top and the left side, your puzzle will have several solutions.

Add and subtract in the range 1 to 20
Think logically
