Name: _____

Burglar Bob

These are the only keys on a safe.

Bob the Burglar can open the safe by making a particular whole number.

For example, he can make the number 13 by pressing these keys.

$$37 - (3 \times 7) - 3$$

When he presses = the safe will open.

Find a way for Bob to open the safe for each number from 1 to 40.

You can use just some or all of the keys each time but use as few as you can – Bob has to be quick!
